-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Election/Restrictions***

The Examiner inadvertently overlooked the Preliminary Amendment filed on 2/5/2004 which cancelled method claims 1-16. Therefore, the Restriction Requirement mailed on 12/27/06 was sent in error, and is hereby withdrawn.

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 17-21, 23-24, 26,37,42, and 49 are rejected under 35 U.S.C. 102(b) as being anticipated by Junemann et al (US. Pat. No. 5,791,353).

Junemann et al discloses all that is recited in the claims (see Fig. 1) since it discloses a pressure-conditioning screw having a pressure-tight cylindrical housing 9 designed to operate at an absolute pressure of 0.5-2.0 bars (corresponding to the claimed "hyperbarically pressurized conditioning chamber"), into which tobacco stem material is introduced via pressure-tight lock 3, and exited from pressure-tight lock 4. Steam nozzles 6 treat the tobacco stems and a feeder screw 2 (corresponding to the claimed "mixing conveyor") conveys the material from entrance to exit along an incline of up to 20 degrees. (See entire document).

Several of the above claims contain "functional" language, i.e. "speed of the conveying screw". Applicant is reminded that where the claimed and prior art apparatus

Art Unit: 1731

is identical or substantially identical in structure or composition, a *prima facie* case of either anticipation or obviousness has been established. *In re Best*, 562 F.2d 1252, 1255, 195 USPQ 430,433 (CCPA 1977). In other words, when the structure recited in the reference is substantially identical to that of the claims, the claimed properties or functions are presumed to be inherent.

### ***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 22, 25, 27, 38-41, 43-48, and 50 are rejected under 35 U.S.C. 103(a) as being unpatentable over Junemann et al (US. Pat. No. 5,791,353).

While Junemann et al may not explicitly disclose the subject matter in the above claims, each of these features would have been obvious modifications to one having ordinary skill in the art.
